ABOUT ME

I am a dedicated MCA student with a strong interest in cybersecurity, network security, and application development. I have hands-on experience with Python, Java, HTML, and CSS, and enjoy ethical hacking, analyzing security threats, solving coding challenges, and applying my knowledge to real-world IT and cybersecurity projects while continuously learning new technologies.

PROJECTS

E-Vidya: Worked on an Android E-Learning Quiz Application using Kotlin and Firebase, focusing on user authentication, quiz management, progress tracking, random question generation, and secure cloud-based data storage through Firebase Firestore.

Secure Login System: Worked on a secure authentication system using Flask and bcrypt, focusing on password hashing, session management, user authentication, and brute-force attack prevention.

Phishing Detection System: Worked on a phishing detection tool using Python, combining rule-based URL analysis and VirusTotal threat intelligence to identify malicious URLs, phishing indicators, and suspicious websites.
